## Rural Power Line Hooked Up Friday

Friday, March 10, was a day to be remembered in many homes in the district as it was on that day at 2 p.m. that Mr. Sid Cannings, chairman of the Carbon Rural Electrification Association threw the switch of the transformer east of town connecting the power supplied by the Canadian Utilities of Drumheller with the new lines built throughout the district, north, south and east.

It is just about a year since the first meeting was held in the Legion Hall at Carbon, when Mr. Marsh of Drumheller, representing Canadian Utilities, met with the farmers of the district to explain the organization of an association. At a subsequent meeting a board of directors was elected, consisting of Sid Cannings, chairman, Andy Mortimer, Glen McMann, G.E. Schell, W. Marshman, E.D. McKellar, H. Bramlley, with Verne J. Dresser secretary-treasurer. It was owing to the untiring efforts of this board that the line was completed and 53 farm homes supplied with electricity. —Contributed

## Joe Appleyard Rink Wins In Farmers' Bonspiel

The rink skipped by Joe Appleyard dominated play in the farmers bonspiel last week by taking first prize in the Hereford event and second in the Shorthorn. The foursome defeated Leo Ohlhauser in the Hereford competition but lost to Sid Cannings in the Shorthorn. Earl Morgan skipped his rink to victory in the Peanuts (consolation) by defeating Dave Gleck in the final. Prize Winners in each event follow:

Hereford—Joe Appleyard, 1st; Leo Ohlhauser, 2nd; Stan Gouldie, 3rd; Bert Charlebois, 4th.

Shorthorn—Sid Cannings, 1st; Joe Appleyard, 2nd; Bert Charlebois, 3rd; Stan Gouldie, 4th.

Peanuts—Earl Morgan, 1st; D. Gleck, 2nd; Hartley Hay, 3rd; D. Garrett, 4th.

The Carbon team Sunday defeated the Rosebud sextet 6-3 in a game played at the local rink. During the game Gordon McLeod was hit on the forehead by a puck and several stitches were required to close the wound.

Carbon lineup — Goal, G. McLeod, H. Hunt; C. White, B. Wilson, R. Heath, O. Gackle, Ginther, J. Foster, T. Heath, D. Rott, W. Wright.

Pupils of Carbon high school recently held a surprise farewell party for Lorraine Milligan at the home of Dale Rott. Lorraine, who is leaving shortly for Edmonton, was presented with a gift of tea spoons.

—The United Church Junior Aid wishes to announce that the date of their shower has been changed from Tuesday, March 21st, to Friday, March 24th. It is to be held at the home of Mrs. Ed Ohlhauser. Anyone wishing a ride down please contact Mrs. R. Campbell or be at the church at 8 p.m.

## Planning To Search Market For Tar Sands

EDMONTON.—The Alberta Government is not planning to operate its tar sands plant at Bitumont this summer, it was learned.

Satisfied they have found the proper method of separation of the oil from the sands, the government is planning more research as to markets for the products which can be taken from the plant.

The plant, being watched during the winter by a skeleton staff, is on the Athabasca River, north of McMurray.

## Statistics Show Farm Wages Down

OTTAWA.—A downward trend in farm wages was noted by the bureau of statistics.

Farm workers were getting an average of \$3.63 a day plus board in January, a drop of 41 cents from the 1949 average of \$4.04.

Without board, the average daily rate was reported at \$4.52, down 45 cents from last year's \$4.97.

## DON'T NEGLECT STUBBORN COLDS!

School Children grow so fast and are so active that many become run down and listless—and may suffer from repeated colds. Give your children easy to digest, pleasant-tasting Scott's Emulsion containing Natural Vitamins A and D and other necessary elements to help build up resistance. Buy the economical large size and save.

**SCOTT'S EMULSION**  
NOT JUST A TONIC—  
IT'S POWERFUL NUTRITION

## WAKE UP YOUR LIVER BILE—

Without Calomel—And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out about 2 pints of bile juice into your digestive tract every day. If this bile is not flowing freely, your food may not digest. It may just decay in the digestive tract. Then gas builds up your stomach. You get constipated. You feel sour, sunk and the world looks punk.

It takes those mild, gentle Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Effective in making bile flow freely. Ask for Carter's Little Liver Pills, 35¢ at any drugstore.

## NEW NEW NEW BURGESS FLASHLIGHT BATTERY

- ★ SEALED IN PLASTIC AND STEEL
- ★ CHROME PROTECTED
- ★ LONG LIFE
- ★ FRESH POWER
- ★ GUARANTEED BY THE MAKER... BURGESS

The new Chrome protected Burgess Flashlight gives you extra hours of bright light. It's new design ensures dependable FRESH POWER always. Every battery is guaranteed by the maker—BURGESS—an old reliable name in the industry. So when you buy, insist on the new full-power BURGESS Flashlight battery.

## Two Asbestos Finds Made In Saskatchewan

REGINA.—Two promising asbestos deposits have been discovered in northern Saskatchewan, it was learned here. The asbestos finds were made at Reindeer lake, 100 miles northwest of Flin Flon, and Ruth lake, 30 miles southwest of Flin Flon.

Two of the largest asbestos companies in Canada are known to be interested in possible asbestos development in the province.

The companies are expected to carry out further investigations this summer.

Though little exploration has yet been made of the asbestos discoveries, they are believed to be much more promising than previous finds in the province which proved to be commercially unfeasible.

With higher freight rates now in effect and extensive construction now under way in the west, the asbestos companies are expected to investigate any possibility of western commercial development.

Asbestos is a non-burning fibrous mineral used in construction materials.

An asbestos plant located in Saskatchewan would be in a central position to serve the entire west. W. James Bichan, provincial director of mineral resources, said.

## FUNNY And OTHERWISE

Hotel Keeper—Here are a few views of our hotel for you to take with you, sir.

Guest—"Thanks, but I have my own views of your hotel."

Diner—Here, waitress, take this chicken away; it's as tough as a paving stone.

Waitress—Maybe it's a Plymouth Rock, sir.

The food at home is cheaper far, And often more delicious, But when you leave the restaurant

You also leave the dishes."

"Elsie told me she likes the sound of Reggie's voice," said Mary.

"Yes," Jane replied, "she thinks there's a ring in it!"

"I wouldn't have minded the things you said," grumbled hubby, "but I didn't like being called 'only half a man'."

"But," she replied sweetly, "I did not."

"No?"

"No. I said, 'If you were only half a man.'"

It was the ship's concert, and the song was "Asleep in the deep". The singer had got well and truly deep when an awed voice from the back of the hall was heard:

"Throw out a depth charge, guv'nor, and bring him to the surface."

## Take Vitamins

**ALLENBURY'S Haliborange**

## The Nice Way

A teaspoonful of Haliborange contains 4200 International Units of Vitamin A, plus 595 I.U.'s of Vitamin D. Mixed with water Haliborange makes a health-building pleasant-tasting orange drink.

From all Druggists, 85¢, \$1.50 and \$2.75.

## THE TILLERS

—By Les Carroll

## Scheme Was Successful

Bert Earls, Bay Trail, Sask., and his brother decided to cerasan the barley last spring and had great success. They bought masks intending to mix the cerasan by shovelling the grain around but were not satisfied with the idea so thought of the scheme of belting the little engine to the cement mixer and fanning mill. Snap shows fanning mill and cement mixer sitting in the half box. Barley is poured into the fanning mill grain, shovelled into the mixer, cerasan mixed. This is stirred and then the grain is dumped into scalding trough and then shovelled into bin in granary. Picture was taken when northeast wind was blowing so they didn't have to bother with masks.

## Western Briefs

### May Establish Token Fee

REGINA.—If costs of the Saskatchewan hospital services plan continue to rise, it may become necessary to charge patients under the plan a small token fee upon entering hospital. This was the opinion expressed by the provincial health survey committee at a recent meeting.

### Re-Enter Politics

CALGARY.—The Alberta Progressive Conservative association decided at its annual convention here to re-enter provincial politics. The decision was unanimous. The last time the Conservatives went to Alberta voters as a party was in the 1935 provincial election. Since then they had been identified with the Independent party movement.

### Damage B.C. Crops

VANCOUVER.—Bud-killing frost has severely damaged the 1950 peach and apricot crop in the Okanagan and Similkameen Valleys, it was learned. Official estimates of damage have not yet been released, but it is believed all peach and apricot buds in the areas have been killed. Cherry buds have suffered sharply and Bartlett pear production is expected to be down 10 per cent.

### Fish Sold In Province

REGINA.—Approximately one-fourth of all fish taken in Saskatchewan during the 1948-49 fiscal year were sold within the province. Fishing operations in the province during the same period were carried out by an estimated 1,370 commercial fishermen.

### Picks All-Star Team

CALGARY.—Frank McCool of the Calgary Albertan made the following Western Senior league All-Star selection: Goal, Russ Dertell of Calgary; defence, Edmonton's Pug Young and Julian Sawchuk of Stamps; centre, Tom Burlington of Quakers; right wing, Ab McDougall of Caps; and left wing, Colin Kilburn of Edmonton.

Frank Currie of Flyers gets the nod as All-Star coach. He also picks Kilburn as most valuable player and Hugh Coffin of Stamps as best rookie.

An antique must be at least 110 years old. 2871

## Tasty? Sure, they're MAGIC baked!

### GINGER CUP PUDDINGS

Mix and sift twice, then sift into a bowl, 1½ c. once-sifted cake flour, 2¼ tsp. Magic Baking Powder, ½ tsp. salt, ½ tsp. ground ginger, ½ tsp. ground cinnamon, ½ tsp. each of ground cloves and grated nutmeg. Cut in finely 5 tbs. chilled shortening and mix in ½ c. lightly-packed brown sugar. Combine 1 well-beaten egg, ¼ c. corn syrup and ½ c. milk. Make a well in dry ingredients and add liquids; mix lightly with a fork. Two-thirds fill greased cup-cake dishes with batter. Bake in moderate oven, 350°, about 25 minutes, or cover each pudding with wet cookery parchment paper, tie down and steam for 25 minutes. Serve hot with vanilla sauce. Yield—5 servings.

## LOW COST WEED CONTROL

## DOW WEED KILLERS

Kill weeds easily, quickly, chemically with Dow Weed Killers. 2-4 Dow Weed Killer controls most weeds without harming many crops. See your local agent handling 2-4 Dow Weed Killer and other Dow products without delay.

DOW CHEMICAL OF CANADA, LIMITED  
204 Richmond Street West  
Toronto 1, Canada

## Report Shows Most Convicts "Repeaters"

OTTAWA. — Nearly 79 per cent. of the 4,225 convicts in federal prisons have served previous jail sentences, the Commons was told. Eighty-seven were women.

During the 1949 fiscal year, 1,843 were sentenced to one of the federal penitentiaries and 62 per cent. of them had previous convictions, the annual report of Maj.-Gen. R. B. Gibson, federal penitentiaries commissioner, said.

The report, tabled in the Commons by Justice Minister Garson, said that during the year prison staffs followed the philosophy that "the true purpose of the prison is not only to keep in safe custody those committed to its care but to train, uplift and educate its inmates for better and future citizenship."

It was too early to say if the program based on that philosophy was successful but "there has been a sufficient number of individual cases brought to our attention to provide encouragement and to justify a further development of the program..."

Of the 1,843 men given prison sentences—two years or more—1,422 had served previous sentences in county jails, provincial reformatories or federal prisons.

The report also noted that more than 88 per cent. of the convicts were born in Canada and that the percentage of foreign-born convicts was steadily dropping.

During the year, the production of prison industries and farms was valued at \$1,434,775.11. Most of it was consigned to the federal government service and the convicts made 49,174 mail bags for the Post Office Department, repaired 451,866 mail bags, made 4,000 ballot boxes and turned out more than 56,000 cement blocks and bricks.

Of the total number of convicts, 157 were serving life sentences, 69 were serving sentences of 20 years or more and 378 were serving sentences of between 10 and 20 years.

The biggest block of the convicts—1,060—were between 30 and 40 years old.

### KITCHEN MEDITATIONS

#### A CHIP ON YOUR SHOULDER

By JANE DALE

If you carry a chip on your shoulder  
As you travel the highway of life,  
The innocent words of thoughtless folk  
Will bring you misery and strife.  
If you carry a chip on your shoulder  
Adventure will lose all its zest;  
Achievements will be a worthless gain  
For your spirit will know no rest.  
If you carry a chip on your shoulder  
You will doubt the friends who are true;  
You will question their motives of kindness  
And the joy they get serving you.  
Throw off that chip from your shoulder,  
Let cynicism hold no sway;  
Let doubts and fears no purchase gain  
Upon your heart this day.

#### YOU'RE TELLING ME

By WILLIAM RITT  
Central Press  
Canadian Writer

Birds, according to a naturalist given to studying such things, are really not cheerful. Well, as long as they keep on pretending, why worry?

More evidence that boyhood isn't as much fun as it used to be is news that someone has invented an unbreakable street light.

Former German armament maker has gone into the bakery business, according to a dispatch from Berlin. But he's still making sinkers—doughnuts instead of torpedoes.

A magazine suggests that railroads paint amusing pictures on their freight cars. That certainly would be something—a comic strip 100 box cars long.

California's racing fans failed to collect over \$200,000 in good tickets during the past year.

FIRE DESTROYS TERRACE OF THREE DWELLINGS—Homeless after fire at Lindsay, Ont., which destroyed a terrace of three dwellings, are these people and their belongings. Thirty persons were affected. Firemen fought blaze for five hours. One boarder, George Fanning, lost \$200 which was tucked away in a trunk. Fire started in cellar of one of the tenants, Jack Allan, one of the Lindsay firemen.—S.N.S. photo.

### TRY AND STOP ME!

By BENNETT CREE

That large and discerning segment of the population which is convinced that W. C. Fields could do no wrong rates among his more memorable bits of repartee the occasion when a matron found him in the throes of a simply overwhelming hangover. "What's the matter, Mr. Fields?" she rasped unfeelingly. "Somebody," explained Fields, stifling a groan, "put two olives in my martini."

The matron held her ground, and suggested "A bromo might help you." Fields didn't think so. "I couldn't stand the noise," he explained.

A duffer agreed to make a fourth in a golf game. On the first tee he took a violent rifle, and missed the ball completely. With rare presence of mind, he turned to his host and remarked, "It's obvious that this course is built about two inches lower than my home layout. Somebody might have told me!"

A person's voice may alter and diminish in volume at a high altitude, due to the rarified air.

### Weekly Tip

#### CIGARETTE STAINS

"How can I get tobacco stain off my fingers?"  
Household ammonia and peroxide in equal proportion will do the trick. Put it on with a bit of cotton. Wipe it off, add some hand lotion and the hands are as good as new.

## Advocates Cat Fighting To Improve Breed

BANGKOK.—Now it's cat fighting—for the improvement of the breed. A retired Thailand police officer is seeking government permission to promote cat fighting as a sport in Bangkok, which already has fish fighting, cock fighting and a strange sport known as Siamese boxing.

Disturbed by the realization that the famed Siamese cat is no longer what it used to be, the animal lover decided that the only way to encourage Thais to breed more cats is to have cat fighting.

Genuine Siamese cats (rarities in Thailand, incidentally) could be sold at high prices to cat lovers abroad, he hinted coyly.

Once upon a time, the Bangkok municipality did sponsor contests for cats, but they were held on points of beauty and charm and were not exciting enough to push people to extend efforts along cat-breeding lines.

"Cat fighting will attract large crowds of people because it will be the first time in Thailand that this kind of thing will come into being," the former police officer explained. "Proceeds from the fights will go at least one half to the furtherance of the welfare of cats of the realm."

The promoter says he is ready to construct a special enclosure of bamboo, big enough to prevent the feline opponents from running away into neighboring houses. There will be rows of spectator seats for humans paying cash.

Today is yesterday's pupil.

### GEMS OF THOUGHT

#### FAITH

He who believes in goodness has the essence of all faith. He is a man of "cheerful yesterdays and confident tomorrows."—J. F. Clarke.

Faith is a gift of God which man can neither give nor take away by promise of rewards or menaces or torture.—Thomas Hobbes.

No man has power to let another prescribe his faith. Faith is not faith without believing. — Thomas Jefferson.

Nothing in life is more wonderful than faith — the one great moving force which we can neither weigh in the balance nor test in the crucible. Harvey Cushing.

Faith marches at the head of the army of progress. It is found beside the most refined life, the freest government, the profoundest philosophy, the noblest poetry, the purest humanity.—T. T. Munger.

Faith full-fledged, soaring to the Horeb height, brings blessings infinite, and the spirit of this orison is the fruit of rightness, — "on earth peace, good will toward men." — Mary Baker Eddy.

The first Olympiad was held in Greece in 776 B.C.

## On The Side —By— E. V. Durling

Men living in cold climates who go hatless in the winter are usually suffering from a touch of inferiority complex. Going hatless in below freezing weather gives them a mental build-up. Makes them feel rugged and superior to the hat wearers. This item is from File No. 345 of the our Mules & Men Department. This makes them feel "cute". The statuesque females, those over five feet, seven, and weighing more than 135 pounds, are greatly handicapped in love and matrimony because, owing to their size, they are unable to employ the clinging vine technique without appearing foolish. They are forced to depend on the "maternal" or "little boy" technique in intriguing their sweethearts or spouses, which is not nearly as effective as the clinging-vine system so successfully utilized by the petite types.

#### DOCTOR PATIENTS

A good sign that a male patient is on the mend is when he begins squawking about the service he is getting at the hospital. That is when he starts saying the bed isn't made right, the nurse is neglecting him, the food is terrible, etc. A good sign that a feminine patient is on the upgrade is when she asks for her make-up box or wants a manicure. So I am informed by a hospital nurse of long experience. This nurse says that the worst of all possible hospital patients are doctors. She says when a doctor gets sick he really makes something of it. She adds: "Even if he only has a boil on his neck the doctor patient soon has the entire hospital in an uproar."

#### BRIEFLY

"Marrying for love may be a little risky," said Josh Billings, "but it's so honest that God cannot help but smile at it." . . . Oliver Hinsdell observed: "In women, low pitched voices are best for that warmth and resonance which stirs the opposite sex." . . . Advised Confucius: "Don't buy until you have gotten prices for three places."

#### SOLAR ENERGY

Something more for the coal industry to worry about. Prof. Adrien Daninos, of Cairo, Egypt, claims to be prepared to manufacture equipment that will heat and light small houses with the use of solar energy. The good professor says that with his gadget, which can be retailed at a moderate price, householders will not have to worry about gas, coal or electric bills. For the present Prof. Daninos will confine his activities to Egypt.

#### ASKING

Queries from clients: Q. So a dog is smarter than horse, you say. All right, we won't argue. But tell us which is the smarter, a horse or a mule? A. Mister, there you have an argument. Most people claim a mule is smarter. They say, for example, that if a horse is entangled in a barbed wire fence he will struggle to get out and cut himself all up. But that a mule in the same predicament will wait for some man to come along and cut him out. That may be true of some horses, but not of those western cow ponies. Some of those cow ponies are nearly as smart as dogs. Another smart type of horse is the polo pony.

#### BRIEFLY

It was Lamartine who said: "The reason women are so much more sociable than men is because they act more from the heart than from the intellect." . . . Much is said regarding blonde females, but little as to light-haired men. Men with blonde hair are usually good fighters. Nearly all the great gunfighters of the old west had blonde hair and that includes "Wild Bill" Hickok, Wyatt Earp, Frank and Jesse James, Billy the Kid, and the Younger Boys.

—Carmack, in The Christian Science Monitor.

## HEALTH

### Modern Techniques Save "Dead" Teeth

With modern surgical techniques and bacteriological controls, it is now possible to successfully treat and return to normal function many teeth which only a short time ago would have been condemned as possible sources of focal infection, it is stated by Dr. W. J. Johnston of McGill University.

In an article—"The Problem of the Dead Tooth"—in Health, official magazine of the Health League of Canada, Dr. Johnston, who is Assistant Professor in the Faculty of Dentistry at the Montreal university, tells about the recent developments in the treatment of teeth from which the pulp has been removed—causing them to be labelled as "dead". No longer is it necessary to remove "dead" teeth for fear of infection, nor do they necessarily have to turn black and become an eyesore in the mouth.

He describes a pulpless tooth as one which has lost its central tissue either through intentional removal, through disease or through natural physiological processes. In all other respects it is identical with a vital tooth except that its metabolism is present to a lesser extent. However, as long as the periodontal membrane remained healthy, the tooth would be maintained. The periodontal membrane attaches the tooth to the surrounding bone by a network of fibres.

There were three main causes of pulp injury—bacterial, physical and chemical. Of these, bacterial is the most important. Unchecked decay would allow bacteria or their toxins to gain an entrance to the pulp through a break in the dentine and, within a short time, would make the entire pulp a living culture tube. Physically, falls or blows could cause pulp injury, while drugs used in treating cavities could produce lasting damage. This last cause, however, is not as common today as it was at one time.

Dr. Johnston indicates that diagnosis is not always easy, but that a correct diagnosis must be made before correct treatment can be undertaken. Treatment or operation can be termed a success when proof is obtained of the sterility of the infected tooth.

He says that in modern dentistry the pulpless tooth is no longer unequivocally regarded as an infectious detriment to the health of the patient and as such extracted with dispatch and without further consideration.

Regular medical and dental check-ups can do much to locate incipient disease, and are major factors in the maintenance of health.

**Carbon Couple Married In Late Winter Rites**

A late winter wedding of interest in the Carbon district was solemnized on February 18 in St. Gabriel's Catholic Church, Carbon, when Mary Bernice Simon, daughter of Mr. and Mrs. D. Simon of Carbon, exchanged marriage vows with Mr. James A. Gouldie, son of Mrs. L. Gouldie of Calgary. Rev. Father Molnar performed the nuptial rites.

Given in marriage by her father the bride was gownned in traditional white satin featuring a lace yoke and peplum. Her long veil misted from a beaded coronet and her only jewelry was a rhinestone necklace.

Full-skirted frocks of embroidered net and satin in shades of yellow and blue were worn respectively by the bridesmaids, Misses Rosie and Gladys Simon, sisters of the bride. To complement their gowns they wore elbow length gloves of chantilly lace.

The bridegroom was attended by his brothers, Messrs. Sam and John Gouldie. The guests were ushered to their places by Mr. Stan Gouldie and Mr. George Levins. During the signing of the register Father Killan sang 'On this day, O Beautiful Mother' accompanied by Mrs. Stan Gouldie.

A reception was held at the home of the bride's parents where the bridal couple was assisted in receiving their guests by their mothers. Father Molnar proposed the toast to the bride while Father Killan asked the blessing.

Mr. and Mrs. Gouldie spent their honeymoon in Calgary and have now taken up residence in Carbon. The bride's going away ensemble was of shepherd's check complemented with pink accessories, a black coat and a corsage of red roses.

as Authorized Dealers for  
**PONTIAC BUICK**  
and **GMC TRUCKS**  
**IN CARBON**

\* The appointment of Garrett Motors as authorized dealers for Pontiac and Buick cars and GMC Trucks is announced with pleasure by General Motors. The new dealership stands pledged to bring the motoring public of Carbon and district the very highest standard of GM service.

A feature of the new dealership is its well-equipped, expertly-staffed Service Department, available to the owners of all makes of cars and trucks. An efficient Parts Department is also Maintained, carrying a wide range of genuine Factory-Approved GM Parts and Accessories for your convenience and quick service.

Next time your car or truck needs attention drive in to Garrett Motors and get acquainted with their attractive facilities.

These lines are in addition to the Chevrolet, Oldsmobile and Chevrolet Commercial lines now held by this firm.

## G. H. Pickup Retires From The Shellbrook Chronicle

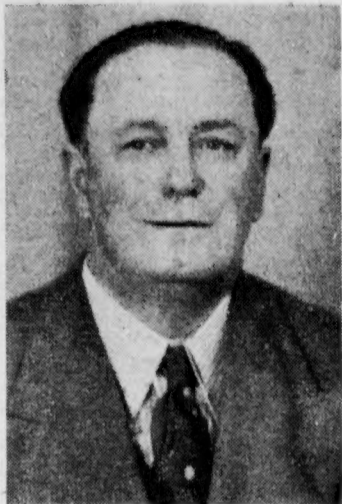

On January 3rd Granville H. Pickup sold his interest in The Shellbrook Chronicle and other papers at Shellbrook, Sask., to Frank J. Pepper, after being in the publishing business for 38 years and retiring at the age of 50 years.

Back in 1912 Ernest G. Pickup commenced publication of The Shellbrook Chronicle, and had his son Granville and William Good on the staff. Granville says the business was small then, but so was the town. In 1931 Mr. E. G. Pickup passed on, leaving the business to his son Granville and daughter Amy (Mrs. F. J. Pepper). Since that time the business has been under the management of Messrs. G. H. Pickup and F. J. Pepper, and has grown steadily until today it is one of the thriving publishing businesses of northern Saskatchewan. Mr. Pickup was editor and general manager and Mr. Pepper as advertising and circulation manager. The staff included Mrs. L. Loth, Mrs. E. Benoit and Miss P. Peterson.

Granville Pickup has taken an active part in public enterprises in the town, having served as mayor for two years and councillor for six years. He was president of the Shellbrook Curling club for two years and on the committee for about 10 years. For 36 years has been organist of St. Andrew's Anglican church and for 31 years had been a member of the vestry. During the last war was a very energetic salesman for all the Victory Loan campaigns. He is also a member of the Shellbrook Elks Lodge.

Besides being in the publishing business Granville has also taken a keen interest in the farming possibilities of northern Saskatchewan, owning 10 quarter sections of land at Sturgeon Valley, near Shellbrook, where he says, is located some of the best land in Saskatchewan, namely: Kamsack silty clay loam. He has never had a crop failure. Mr. Pickup does not farm himself, but his land has been rented (using his words) to "three good farmers" for many years.

Granville Pickup is reluctant to tell of his experiences during his 38 years of publishing papers, but is zealous in boosting his home town. Since 1912, he says Shellbrook has made steady healthy growth to a population of approximately 700. It

G. H. Pickup

has become a centre of an important mixed farming area, and an important junction on the C.N.R. with four lines of this railroad running from it. Around 25 miles of railroad and a bridge over the northern Saskatchewan river will give it a direct line to Saskatoon which is 90 miles south. Another uncompleted line is the C.P.R. line from North Battleford with about 70 miles to be constructed. The C.P.R. line from Prince Albert to Meadow Lake passes through Shellbrook. When these lines are completed Shellbrook will have seven lines of railroad, thus making it quite a railroad town. A new modern 20-bed hospital and a new post office has been built which are a decided asset to the town and district.

## WORLD HAPPENINGS

BRIEFLY TOLD

The government has announced that television receivers will go on the market in Holland some time this year.

Dr. Augustin Nores Martinez, 40-year-old diplomat, lawyer and author, officially became Argentina's ambassador to Canada recently.

Romania has ratified an agreement with Russia clarifying the frontier line between the two countries. The agreement provides for some adjustments in the borders.

What is a probable record for lieutenant-governors has been set by Sir James Mitchell. Sir James, who has been lieutenant-governor of western Australia for 16 years, is now 83 years old.

Mr. Pickup is also energetic booster for the Prince Albert National Park, and says by travelling on the gravelled highway from Shellbrook to Waskesui Lake saves tourists from Saskatoon and other points some 60 miles. Three provincial highways radiate from Shellbrook, namely: No's. 3, 40 and 55.

The numerous friends of Mr. Pickup are wishing him good health and much happiness in years to come, but are wondering if he will be able to refrain from the printer's ink that has worked deeply into his veins.

## How I Subdued Wild Fiery Itch—

Dr. Dennis' amazingly fast relief—D. D. D. Prescription—did the trick. World popular, this pure, cooling, liquid medication speeds peace and comfort from cruel itching caused by eczema, pimples, rashes, athlete's foot and other itch troubles. Trial bottle, 35c. First application checks even the most intense itch or money back. Ask druggist for D. D. D. Prescription (ordinary or extra strength) now.

### Answer To Last Week's Puzzle

# Hope Experiments Will Show How To Use Waste As Fodder

By LORNE WADDELL  
(Central Press Canadian  
Correspondent)

Thiamin, the Vitamin B1 essential for human life, is a vital food for fungi and appears to hold part of the answer to the question of what makes your porch floors rot and your trees decay.

Dr. Marshall W. Jennison at Syracuse university, N.Y., is raising 36 different species of fungus in his laboratory to determine the vitamins they require for life and how they utilize these necessary growth factors. The organisms responsible for wood rotting have had a variety of diets in the flasks and bottles lining the walls of his tiny lab.

While much previous research into the prevention of wood rotting has been conducted by chemists, Professor Jennison is attacking the problem from the viewpoint of the bacteriologist. He believes he must know how the fungi live before a method can be developed for killing them.

The Office of Naval Research, which granted him funds for fundamental studies in the field, is interested in the prevention of wood decay, but the professor's own interests go farther.

Dr. Jennison seeks to determine the chemical products of wood destruction by the various fungi. He wants to produce such substances on a large scale from waste cellulose and learn, for example, whether animal feeds can be produced economically through the partial digestion of waste materials by fungi.

Success of his fundamental research in the physiology of fungi may enable science to find practical uses for millions of tons of organic materials such as sawdust, peanut shells, pea vines, corn cobs and asparagus stalks.

Wood-rotting organisms, some 2,000 species of which are known, fall into the Basidiomycetes class that includes mushrooms, "puff balls", and the pale, bracket-like fungi often seen on trees in forests.

They can live on the structural timbers of buildings as well as on living or dead trees, attacking the cellulose-lignin complex which is characteristic of wood. The so-called "brown rots" destroy "white rots" break down the cellulose and the lignin.

The very fact that in the degradation of cellulose matter these fungi form new chemical compounds gave the Syracuse university professor the idea that these undesirable and harmful activities could be turned into economically useful channels.

A laboratory technician forces air into flasks in which fungi are cultured at Syracuse university. 10,000 such cultures have been produced in an effort to find uses for waste organic material such as sawdust, corn stalks, etc.—Central Press Canadian.

When Dr. Jennison began his experiments, little had previously been studied in fungal nutrition. Even less had been done in the systematic investigation of the organisms' basic life processes.

Recognizing that this knowledge must be obtained before wood destruction could be controlled and before waste cellulose could be salvaged, he concentrated on learning what nutrients were required by 36 of the fungal species.

His basic method for growing what scientists call "wood rots" was that of aerated liquid culture. He employed small flasks on a specially-built double reciprocating shaking machine. For larger cultures, he used big, stoppered bottles into which air was forced.

Thiamin is necessary for all 36 fungi, he discovered in analyzing the effect on growth of many nutrients of known composition and developing synthetic or chemically-defined media for culturing the organisms.

Dr. Jennison ran nearly 10,000 shake cultures on compounds of known composition, using all available amino acids, vitamins, and other growth factors, plus a variety of inorganic nitrogen sources added in different combinations to a basal medium.

Biotin, or Vitamin H, can be used to replace thiamin with some species, but Dr. Jennison noted that growth was not as good. No other vitamin by itself can take the place of thiamin. Certain other growth factors added with thiamin will greatly stimulate development, however, particularly when inorganic nitrogen sources are used.

Industry has more than a casual interest in this Syracuse research project. Several representatives of manufacturing concerns already have approached Dr. Jennison with their own problems which hinge on the success of his experiments. These problems deal with the profitable utilization of now-useless cellulose waste.

The Syracuse professor believes his studies may help toward the solution of what can be done with the millions of tons of bulky waste by-products now accumulating behind the nation's factories and canneries. His bottle-grown fungi eventually will tell him how they function and

how they can participate in the conversion of these materials.

When he learns what makes the destructive little organisms live, he can determine how to make them work for him and how to keep the structural timber-work from being destroyed by rot.

Thus science, industry, and ultimately the consumer stand to benefit from the revelation of the secrets now held by the odd-looking, round, hairy pellets Dr. Jennison is cultivating in his little lab at Syracuse.

## HERE'S HEALTH!

A bad head cold had Frankie  
It made co-workers cranky.  
He never covered up a sneeze  
Nor bothered with a hankie.

Dept. of National Health and Welfare

## Smile of the Week—

Grandma was telling the family about her day in Cincinnati. "I met such a pleasant young man in the train," she said. "He offered to give me the winner of the Kentucky Derby."

"And did he?" one asked eagerly. "Of course not, my dear," she replied. "I had to tell him that the chickens take up all the garden and we've no room for a horse."

## Market Class

Market class being judged at the 4th "Little Royal" Stock Show, held at Winnipeg, recently. Left to right: Joe De Pape, Swan Lake; Alastair Turner, Salmon Arm, and W. R. Johnson, Morden.

## N.H.L. Sport Notes

### Chicago Shut Out Most Times

Chicago Black Hawks were shut out more times than any other club in the circuit in games up to and including those of February 16. The Hawks were kept off the score sheet six times during that time. Toronto Maple Leafs were shut out the least number of times. The Leafs have been blanked only once this term. Detroit Red Wings and Boston Bruins have each been shut out twice this season to date. New York Rangers and Montreal Canadiens have both been horse-collared three times.

### Consecutive Game Record

Pat Egan of the New York Rangers has played more consecutive games in the N.H.L. than any other player active in the League today. Egan had played in 241 consecutive games after the Rangers-Canadiens tussle on February 18. The previous record among active players was 237 consecutive games and was held by Kenny Smith of Boston Bruins.

### Most Goals By A Player

When Gerry Couture, Detroit forward, scored four goals against Boston Bruins on February 11 he became the first player in the N.H.L. to score four goals in a game this season. Six players have scored three goals in a game this campaign.

### Improved Showing

Metro Prystai, Chicago Black Hawks' hard-working center, had scored 25 goals on February 17. Metro scored the 25 goals in 53 games. Last year in 59 games he scored 12 goals. The husky center is one of the most improved players in the National Hockey League this season.

## The Curler Speaks

By Stuart Peabody

O the squash men thrill  
To the lightning kill,  
Or the shot that dies by the wall;  
And the ski-er years  
For telemark turns  
And for slaloms with never a fall.

The crash of the pins  
And the strike that wins  
To the bowler are sweeter than honey;  
And the hockey fan dreams  
Of the gallery's screams  
And the puck in the cage for money.

There's the smack of a drive,  
And a sloop that's alive  
And hands on a hunter's withers;  
In sporting lore  
There are thrills by the score—  
But they all seem tame to "The Brithers".

Give me the drone  
Of a running stone,  
"On the broom" and curling free;  
Or a shot laid hard  
To take out a guard,  
Or a draw through a port to the tee.

And "SWEEP!" from the lip  
Of a salty skip  
Or "Don't be narrow or light—  
Just let her bend  
And we'll take the end";  
Now "SWEEP!" You can make her bite.

The potent kick  
Of a chip or a wick  
Must be felt to be understood;  
Or a stone well laid  
And a shot that's played  
So it comes to rest where it should.

Be a slave to your sports  
That are played in courts  
Or on alleys or fields say I.  
YOU'LL be paroled  
When you get too old;  
But I'll curl till the day I die.

And as springtime looms  
And we stack the brooms  
And lift the stones to the rack;  
I'll sigh for the time  
When the ice is prime  
And my toe's once more on the hack.

## Garden Notes

### We Can Make Plans

Gardening, of course, is largely an outdoors proposition and that is what makes it such an excellent recreation in addition to its other many advantages. But like almost anything else, gardening will benefit from a little planning before the actual digging and planting begins. And this planning can be interesting and pleasant as well as highly useful. All that is needed is a pencil and a bit of paper, a good seed catalogue and perhaps a government bulletin or two. Equipped with these and a little imagination an entertaining evening is guaranteed.

### The Flower Garden

Laying out a flower garden is something like painting a picture. Generally we want little things, or a piece of lawn in front, with larger and taller masses to the rear and side. We also want plenty of color, and we want that color of flowering to start as soon as possible and continue as long as possible. We will also want a supply of blooms which can be cut for indoor bouquets and some others that will give off a beautiful scent.

Now to meet these and other requirements we must know a few facts. To keep the little things generally in front so that they will not be hidden we must know the height to which our flowers will grow. And for proper planning we must also know approximately the season of bloom for the various plants we like, and their color. We should know whether they are hardy or tender, what are their special requirements. It is possible for example, to get a flower suited to almost any location in the garden. Some like full sunshine, some actually thrive in a dark corner. Some like lots of water, some will flourish almost in dust. Then there are big, bushy things that will grow up like a shrub in a single season, and other annuals that we can use as vines to cover unsightly fences or outbuildings or to shade verandahs. And of course there are a dozen or more that are chiefly grown for their perfume or for giving us long-stemmed bouquets. All the vital facts will be found in any good Canadian seed catalogue.

### The Vegetable Garden

Vegetable garden planning is simple. It is just a case of determining how much space is available, and then laying this out in rows of various widths. For vegetables of medium size like beans, lettuce, carrots and such things it is best to leave at least a foot between rows and up to twice this much will not hurt. More space between makes cultivation easier. Larger growing things like potatoes, peas, corn, etc., should have at least two feet between rows, and a yard will not be too much, especially where a garden tractor is to be used for cultivation. Three feet apart is about the right distance for tomatoes, too, although they can go closer if they are staked. With sprawling vines like cucumbers, melons and small squash, the best plan is to plant in hills of a foot to 18 inches square and at least two feet between.

### SELECTED

## RECIPES

### VEGETABLE SUPPER LOAF

2 cups white sauce  
2 egg yolks, well beaten  
2 cups cooked mixed vegetables  
1 cup fresh bread crumbs  
2 teaspoons chopped parsley  
1/2 teaspoon salt  
Dash of pepper  
1 can condensed tomato soup  
4 tablespoons fat

Make 2 cups white sauce and add the well-beaten egg yolks. Add all other ingredients except tomato soup and fat.

Pour into a well-greased casserole and bake at 350F., about 20 to 25 minutes.

Serve with a tomato sauce which is made by heating the tomato soup with the 4 tablespoons fat. Garnish with slices of hard-cooked eggs.

### DELIGHTS

1/2 pound marshmallows  
1/2 pound pitted, chopped dates  
1/2 pound chopped nuts  
1/2 pound shredded coconut

Cut marshmallows into top part of double boiler and melt. Add dates and nuts. Drop by spoonfuls into the shredded coconut. Chill on waxed paper.

Serve as a confection or small cake.

### MANLY MINER ELECTED TO BOARD OF BIBLE SOCIETY

Manly F. Miner, eldest son of the late Jack Miner, Canadian Naturalist, of Kingsville, Ontario, was elected to the Board of Governors of the British and Foreign Bible Society.

The organization which is world wide in scope prints the Bible in every language and distributes it to every country in the world. 2871

Be sure to write plainly your Name,  
Address and Pattern Number.

## Helpful Hints

Keep peeled garlic buds in salad oil in your refrigerator. They will keep indefinitely, and will flavor the oil which you can use in your French dressing.

Regardless of the type of equipment you are using when ironing, say experts, always iron with the grain of the fabric and never pull the garment.

It is advisable to remove cellophane from a new shade as soon as purchased. Heat and atmosphere conditions will cause the cellophane wrapping to shrink and cause it to wrinkle and warp the shade.

## OUR COMPLETE SHORT STORY—

## Happy Ending "Is There No Place At All For An Older Woman?"

By Jeanne O. Wennenkamp

IT WOULD take a minor miracle to bring this day to a happy conclusion. Mary Cody, sitting alone, watched the last few hurrying customers desert the lunch room after the noon-hour rush. Her cup had cooled untasted, and she signalled the waitress for another pot of tea.

"So this is it," she thought. "For years you live on schedule. You dash out of the office at twelve-thirty, hurry through lunch, maybe shop for a trifle if you have time; then back to your desk." Her dark head, with its two wings of white at the temples, bent over the replenished cup. "Then suddenly, without warning, it's all over. You're out; fired. You can sit drinking tea all afternoon . . . or as long as your money lasts. Everybody except you is in a hurry; everybody else in the world is needed somewhere."

She picked up a spoon and stirred listlessly.

"What next?" she asked herself. "Where does a middle-aged woman with a sick mother to support look for a job? Not the department stores; they want young girls with trim figures and bright smiles."

Mary looked at the waitress who was briskly clearing the next table. "And not restaurants. Vitality is what they demand — and a strong back." She picked up a newspaper and turned to the advertisements. "Help Wanted—Female."

As if set in red type, the words jumped at her: "Girls wanted . . . Young ladies . . . Attractive young woman needed for office work . . . Under 35 . . . Girls . . . Girls . . ."

"Is there no place at all for an older woman?" Mary asked herself. "Just what is one supposed to do? Quietly blow away like a sere and yellow leaf?"

She began, for the first time, to think of women she had seen; all the little, inconspicuous shadows who had fringed her own busy days.

How could one, after years of feeling necessary and important to the welfare of a flourishing business, suddenly join these lost ones, the forgotten women?

And how did one go home and tell?

She pictured herself climbing the stairs to the little apartment. The querulous voice of the invalid, so dependent for everything — for home, for care, for touch with life.

Could she keep such a secret? Could she, while her small savings lasted, leave in the morning, and, while she looked for work, maintain the illusion?

And when the money was gone, what then?

"It's not fair," thought Mary. "The young man who comes calling, he's all you ever dreamed of, but he can't take on the support of your ailing mother. So you ask him to wait. But the months slip by, and your salary barely covers expenses. The doctor's bills keep piling up. There's never anything to save toward that rosy future."

"The young man is patient, but gradually stops calling so frequently. Apologetically, then defensively, he makes excuses. Finally, both the excuses and the calls stop."

"Well, you're still young. There'll be other young men . . . and in the meantime, there's the job and mother. Guess you're pretty lucky to be needed. Plenty of time for marriage and children . . . plenty of time . . ."

The tea room was empty now, except for the waitress, eyeing Mary.

As if chill fingers had touched her, she pulled her coat over her shoulders, and fumbled in her bag for a few coins. She placed them on the table, and pushed back her chair and left. She almost ran into an office building across the street.

The elevator operator said, "You're late from lunch, eh, Miss Cody?" and whisked her to the sixth floor.

## Dominion Junior Curling Champions

A rink from Regina's Scott Collegiate, Saskatchewan's representatives in the Canadian junior curling championships at Quebec City, came back after winning two games and losing two games with a brilliant display of curling to win five games straight to capture the Dominion title and the Sifton trophy. Left to right: Bill Clarke, skip; Gary Carlson, third; Ian Innis, second; and Harold Grassie, lead.

Mary Cody entered the office. Without removing her coat, she called, "May I see you a moment, Miss Simpson?"

A woman whose red-rimmed eyes were attempting to focus on a stack of record cards, looked up.

"Yes, Miss Cody," she replied in a small voice, and the two stepped into a glass-walled office.

"Miss Simpson," said Mary Cody, "I want you to forget what I said this morning. We need you here very much."

"Oh, Miss Cody, you mean I'm not fired? I can stay?"

"As long as you want to."

"Miss Cody, I'll be more careful. I won't make mistakes, you'll see. I've just had so much on my mind . . . my mother, you know." She brushed a tear away. "Miss Cody, you'll never know what this means to me."

Mary Cody smiled as she hung her coat in the office whose door read "President".

"I think I know just what it means," she said.

## To Provide Large Sum For Fraser River Improvements

OTTAWA.—The Federal Government will provide \$1,000,000 for Fraser River improvements and \$225,000 for Fraser River dredging in the 1950-51 fiscal year. These were contained in estimates tabled in the Commons by Finance Minister Abbott.

Wharf improvements at Horse-shoe Bay are allotted \$16,000, with \$100,000 for an assembly wharf at Squamish.

Customs and immigration building at Douglas on the King George Highway gets \$125,000, on the Pacific Highway \$100,000 and at Huntingdon \$150,000.

Estimates for harbors and rivers in B.C. and Yukon and public buildings in B.C. are listed here. Many are revotes of funds allotted last year and not yet spent.

## Vancouver Woman's Sight Coming Back

VANCOUVER.—There was a smile on her face and a little sight in one eye as Mrs. Mary Clarkson came home from Mayo clinic in Rochester, N.Y., recently to the arms of her three children.

The Mayo eye specialists had not been able to help her, but on the trip home, for some unexplained reason, one eye began to see again.

"It's wonderful," beamed her husband Ron, who accompanied her East. "Mary was blind when we left Vancouver. Now she can recognize me and the children again."

It was not so much the slight improvement, but the hope that it would continue until she could really see again, that has brought joy to Mrs. Clarkson and the little family.

## Contract To Build Oil Refinery Awarded

EDMONTON.—Contract for construction of the 2,000,000-barrel-per-year refinery on the eastern outskirts of Edmonton for the British American Oil company, limited, has been awarded to Canadian Kellogg company limited, of Toronto, it was reported here.

While the estimated cost of the plant has not been announced, it is believed to be more than \$8,000,000.

Plant construction, expected to begin in April, will take one year, employing 400 to 500 men.

## SCENIC BEAUTY

## Urge Manitobans To Tour Province

PORTAGE LA PRAIRIE, Man. —

Contradicting the assumption of some "plains-dwellers" that Manitoba was necessarily flat and uninteresting, Judge S. H. Fahrni, guest speaker at a dinner meeting of the Lion's club, urged his listeners to make a tour of the province and become acquainted with its geographic and geophysical features. He felt too, that having done so they would be more inclined than ever to become lovers of their own province. They would be charmed with the variety of scenery and way of living that existed here and they would thus become aware of their responsibility in keeping and preserving Manitoba.

"The future of Manitoba, of this community, indeed of this country, depends on you. See that you do something about it," he concluded.

## FROM ANCIENT TIMES

The expression, "key to the city", arose in ancient times when cities were walled and entrance was through high gates. The custom grew of giving distinguished visitors the key to the gates of the city in token of the fact that they were welcome guests of the city.

One of the best defences against disease is cleanliness. Germs detest soap.

# "SALADA" TEA

Bake this tasty CHEESEBREAD

easily, speedily with new Fast DRY Yeast!

• New bread and bun treats are a treat to make with the new form of Fleischmann's Yeast! Never a worry about yeast cakes that stale and lose strength . . . new Fleischmann's Dry Yeast keeps full strength and fast-acting right in your cupboard. Get a month's supply.

## CHEESEBREAD

• Scald 3 c. milk, ¾ c. granulated sugar, 1½ tbs. salt and 4 tbs. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ½ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 mins., THEN stir well.

Stir in cooled milk mixture. Stir in 4 c. once-sifted bread flour; beat with a rotary beater until the batter is smooth. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Work in 2 c. lightly-packed finely-shredded old cheese and 5 c. (about) once-

sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and let rise until doubled in bulk. Punch down dough; turn out on lightly-floured board and divide into 4 equal portions. Cover lightly with a cloth and let rest for 15 mins. Divide each portion of dough into 3 parts; knead and shape into smooth balls. Place 3 balls in each of 4 greased loaf pans (4½" x 8½"). Grease tops and sprinkle each loaf with ¼ c. shredded cheese. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, 45-50 mins.

Everywhere!

**Ten Little Free Workers**

TEN little free workers in this country fine and fair. But if you cherish your freedom—worker have a care! TEN little free workers—Reddy was doing fine Until the socialists got him—then there were nine. NINE little free workers laughed at Reddy's fate Along came federal medicine—then there were eight. EIGHT little free workers thought this country was heaven But the government took over the railroads—then there were seven.

SEVEN little free workers—'til the miners got in a fix Government said coal's essential and took over leaving six SIX little free workers—'til the day did arrive The steel mills were federalized—then there were five. FIVE little free workers—but the farmers are free no more The farms have been collectivized—that leaves only four. FOUR little free workers—the number is getting few But with the government groceries selling food—then there were two.

TWO little free workers—our story's almost done With clerks at work in federal stores that leaves only one. ONE little free worker—the reporter son-of-a-gun Must not criticize government—so now there are none. TEN LITTLE FREE WORKERS—but they are no longer free

They worked when and where ordered, and at a fixed rate you see.

AND IT COULD HAVE BEEN PREVENTED IF THEY'D ONLY SEEN FIT TO AGREE AND WORK TOGETHER INSTEAD OF SAYING "IT CAN NEVER HAPPEN TO ME!"

This little story points out what CAN HAPPEN to us in Canada. It is the story of what HAS HAPPENED in some countries and IS HAPPENING in others as socialization of industry progresses.
